

SaniScent System

With the successful release of the SaniScent sanitizer and fluids; a revolutionary programmable system that helps avoid a range of WC problems.

From the day of installation and all year round the SaniScent consistently freshens bathrooms, saving on maintenance and the use of other products. " [The Smell of Cleanliness](#) "

A high level of hygiene is a social responsibility and the SaniScent Sanitizer can assist you in keeping your WC and urinals clean, hygienic and free of unpleasant odors. A high standard of hygiene in public facilities demonstrates that care is taken in the health and hygiene of the facility and its patrons.

Our SaniScent Sanitizer assists in eliminating offensive odors and reducing stains within washrooms by providing a continuous dose of concentrated and fragranced fluid.

Fresh Fragrances in the Air

With SaniScent special fragrances, the washroom smells clean, fresh and - most of all - inviting. A fresh washroom demonstrates that care is taken with the health and hygiene of the facility and its patrons.

SaniScent Consistently Freshens

SaniScent consistently keeps your washroom smelling fresh, saving on maintenance staff and the uncontrolled cost of cleaning products.

Hygienic Surfaces

Every flush produces a concentrated and fragrant foam, eliminating germs and reducing surface stains and deposits in the urinal porcelain micro-pores.

Automatic Dispenser

SaniScent dispenser doses a hygienic formulation that automatically and continuously flows through the urinals and pipes. Bacteria is created every 20 minutes, the SaniScent formulation eliminates this bacteria 24 hours per day, 365 days a year.

Free Pipelines

SaniScent formulations attack and dissolve deposits, which clog and block internal pipes and pipelines; this is the main cause and source of offensive washroom odors.
