

# NO-TOUCH CLEANING® ATTACHMENTS:

**KAIGROUTER™** - Nothing cleans grout lines faster and better than this patent-pending tool.

**QUICKDRAW™** - Instant chemical injection makes No-Touch Cleaning really practical and very fast in small and mid-size restrooms.

**UPHOLSTERY TOOL** - Spot clean upholstery with this quick connecting accessory.

**DRYAUTO™** - This patent-pending wide-area dry vacuum tool eliminates the need for dust mopping and improves indoor air quality.

**KAIAUTO™** - This patent-pending wide-area squeegee cleans floors as deeply as an auto scrubber but in a way that's gentle on finish.

**CARPET EXTRACTOR** - Clean carpets and tight areas without an additional extraction machine. Meets the CRI (Carpet and Rug Institute) Seal of Approval for deep cleaning systems.

**KAISUMPT™** - Converts a No-Touch Cleaning system into a "continuous" disaster and flood recovery system.

**TOTE BAG** - Large capacity, heavy duty bag perfect for carrying tools and supplies. Holds up to two dozen standard rolls of toilet paper.

**KAIDOLLY™** - Turn your KaiVac 2150 unit into a janitor's closet on wheels.

**DRYVAC™** - Makes No-Touch Cleaning even more convenient and cost-effective, eliminating the need to purchase or transport an additional vacuum cleaner.

- The KaiTurbine head, with its air-driven beater bar, works wonders on carpet. Plus, it's powered by vacuum airflow, not electricity, so it can be used on damp surfaces such as entrance mats.

- The hard surface head is not only highly productive on tile, linoleum, hardwood, and other hard surfaces, but also removes significantly more soil than a traditional dust mop.
